This is absolutely OK for us and there are no disadvantages for you.

AppGini Helper NEWS

NEW VERSION 2020/10

New version released

Hello !

As already announced in the forum and on twitter, I send you the good news that the new version 2020/10 of our AppGini Helper Javascript Library has been released.

[AG Helper Javascript Library](#)

What's new

Additionally to some bugfixes we have added a lot of new features. If you are curious which functions are new, [have a look at the changelog](#).

[Changelog](#)

Update

Those of you who purchased a (lifetime) license including update-option (+ 1 year of free updates) can download the new version as before using the link that was sent to you by fastspring when you last ordered.

If you have any problems with the download, please send an e-mail to appgini@bizzworxx.de and send your order-number and the e-mail address you used when ordering, if different.

Order

Without update option or after expiration you can continue using your current but outdated version or you can [order the new version directly here](#). It is also available together with other components, in the [AppGini store](#)

Order now

I hope you still enjoy all the old features and also like the new features.

With Kind Regards,
Jan

Some new features

2020/10

NEW: Set title (Table View)

Easily change the headline in Table Views (TV) with text or html text

Custom HTML title

Neu

<input type="checkbox"/>	Code	Beschriftung
<input type="checkbox"/>	PRJ-00002	PRJ-00002:
<input type="checkbox"/>	PRJ-00003	PRJ-00003: Testprojekt
<input type="checkbox"/>	PRJ-00004	PRJ-00004: Projekt MU-2000
<input type="checkbox"/>	PRJ-00005	PRJ-00005: Maschine XYZ

Datensatz 1 bis 4 von 4

2020/10

NEW: AddButtonOpen (Table View)

This is a shortcut function call for adding a link-button which opens up the record itself. See also: [AddLink](#)

<input type="checkbox"/>	Symbol	Geschäftspartner
<input type="checkbox"/>		Maschine im Raum Computer Aic Strategy GmbH

2020/10

NEW: Activate child tab

By default, the first visible child tab will be activated on load of Detail View.

Sometimes it is useful to open a different tab. Using the new **activate()** function you can do so.
